

Our product and service offering

Sonova is a global leader in innovative hearing care solutions: from personal audio devices and wireless communication systems to audiological care services, hearing aids and cochlear implants. Our product brands – Phonak, Unitron, Sennheiser (under license) and Advanced Bionics – create compelling new products to offer the optimal solution for an ever growing consumer base through our globally diversified sales and distribution channels, including our well established global audiological care business.

Phonak

Phonak Audéo Life

Phonak's Audéo Life hearing aid introduced in August 2021 is the world's first rechargeable hearing aid that is waterproof¹⁾, showerproof and sweatproof. Audéo Life is another addition to the company's industry-leading Paradise line of hearing aid technology, now the best-selling²⁾ platform in Phonak history. Paradise delivers crisp, natural sound in any environment for excellent sound quality. On the inside, Audéo Life hearing aids are powered by proven Paradise technology including universal connectivity with multiple active Bluetooth® connections, truly hands-free conversations, Tap Control for easy access to voice assistants, and more.

Audéo Life hearing aids feature a unique housing and special coating that seals the device. In addition, they are the first Phonak hearing aids designed with a new induction charger called the Phonak Charger Case Go™. When a consumer places their Audéo Life hearing aids into the new charger case, the hearing aids are magnetically held into place for hassle-free charging at home and on the go.

1) Up to 50cm

2) Compared to Marvel, Belong, Venture and Quest in first 12 months

Unitron

Blu platform

Unitron's new Blu platform introduced in April 2021 provides next-generation sound performance. Powered by the new Sonova PRISM™ (Processing Real-Time Intelligent Sound Management) chip, Blu delivers an adaptable, personalized and freeing experience. It starts with Integra OS, the new signal processing system, that optimizes the listening experience to each wearers specific situation from highly complex to very quiet. Furthermore, with five new hearing aids, three Receiver-In-Canal (RIC) and two Behind-The-Ear (BTE) products that offer Made-For-All technology, plus enhanced personalization capabilities and seamless connectivity, Unitron Blu is designed to keep up with the complexity of everyday life wherever the day may take them.

Unitron's Moxi B-R hearing aid was recognized in 2021 with the prestigious Red Dot: Product Design award, Unitron's 7th award since 2014. The Moxi family and Stride family of products on the Blu platform are Unitron's next generation of hearing instruments, thoughtfully designed to meet the needs of real people.

Sennheiser

MOMENTUM True Wireless 3

Sennheiser's ¹⁾ MOMENTUM True Wireless 3 was introduced in April 2022 and transforms every listen with best-in-class audio and next generation Adaptive Noise Cancellation (ANC).

Delivering unrivalled high-fidelity sound thanks to Sennheiser's acclaimed TrueResponse transducer system and aptX™ Adaptive, the MOMENTUM True Wireless 3 also features advanced Adaptive Noise Cancellation (ANC) that automatically adjusts to one's environment for an immersive listening experience without distractions. Transparency Mode lets the consumer hear the surroundings at a touch, while the personalized sound feature and built-in EQ let you experience audio on your terms. For impressively natural communication, the MOMENTUM True Wireless 3 features an advanced six-microphone system for noise free voice pick-up.

The latest generation of Sennheiser's acclaimed true wireless earbuds takes ease-of-use to the next level with wireless charging and customizable touch controls. IPX4 splash resistance and improved ergonomic design ensure outstanding versatility and all day wearing comfort.

Advanced Bionics

Naída CI Marvel

Through the close collaboration between the brands Advanced Bionics (AB) and Phonak, people with severe or profound hearing loss can now benefit from the breakthrough Marvel cochlear implant technology. With AB's Sky CI™ Marvel, the world's first dedicated CI sound processor for children, and Naída™ CI Marvel for adults, people can connect to the moments they love.

Marvel technology also benefit people with bimodal fittings¹⁾ through the introduction of Phonak Sky Link Marvel and the Naída Link Marvel. As a bimodal system, these devices wirelessly communicate with each other and feature all of the connectivity benefits of Marvel, including Sonova's unique universal Bluetooth® connectivity and RogerDirect™.

Naída CI Marvel is powered by AutoSense OS™ 3.0, which delivers excellent sound quality and performance in a variety of situations throughout the day. This machine-learning algorithm analyzes the sounds in the listener's environment every 0.4 seconds and identifies whether the listener is, for example, in a noisy restaurant, car, concert hall or at home. It then engages the appropriate cochlear implant system features to customize and enhance their hearing experience based on the specific characteristics of the listening environment. AutoSense Sky OS™ 3.0 works similarly to the adult version but is uniquely designed for a child's typical listening environments, providing excellent sound quality and performance wherever the child goes.

1) Many people hear through one hearing aid and one cochlear implant in what's known as a bimodal fitting.
